

WHY RALSTON RESIGNED

Angered by Appointment of the Governor.

Wanted a Mining Man Appointed St. Louis Commissioner.

Killing Stock Near Cow Search for Fremont Collision on Bay.

(BY DIRECT WIRE TO THE TIMES)

SACRAMENTO, June 19.—(Exclusive Dispatch.) Gov. Pardee has accepted resignation of Senator W. C. Ralston, who was quoted as saying that he was not a mining man and was not qualified to represent the State in the Senate.

Ralston's resignation, which was accepted by the Governor, was the result of a long and bitter fight between the two men.

The Governor was to put the resignation to a vote of the Senate, but Ralston decided to resign before the vote was taken.

Ralston had been appointed to the position of Commissioner of the State Lands Department, but he had been unable to get the Senate to confirm him.

Ralston had been in the Senate for several years, but he had been unable to get the Senate to confirm him.

ONE JUROR SAVED JETT.

Eleven Voted to Convict Him of Murder.

Majority of the Jury Was Also Against White.

Next Trial Will Be Held in Cynthiana—Buen to go Into Hiding.

(BY THE ASSOCIATED PRESS—P.M.)

LEXINGTON (Ky.) June 19.—(Exclusive Dispatch.) One juror, Curtis Jett, would have been convicted here today of the murder of Attorney J. B. Marum, and a majority of the jury favored the conviction of Thomas White also. Both are tonight in jail at Lexington, and their next trial will be at Cynthiana, more than one hundred miles from Jackson, away from the mountains, and in the Blue Grass region, under very different conditions from those existing in Cynthiana.

The interest in the case of Jett and White was not only in the verdict, but in the fact that the jury was so evenly divided.

When Judge Redwine refused to hear arguments on the change of the location, it was stated by many in the courtroom that the jury was so evenly divided that it was a foregone conclusion that the jury would be so evenly divided.

The jury was so evenly divided that it was a foregone conclusion that the jury would be so evenly divided.

SCOTTISH OIL COMPANIES.

They Have Struggled Through Bad Year With Credit and Prospects Are Bright for Present One.

(BY DIRECT WIRE TO THE TIMES)

LONDON, June 19.—(Exclusive Dispatch.) The Economist calls attention to the fact that the four remaining Scottish oil companies have struggled through a bad year, credit, having, in spite of low prices, been able to earn considerable dividends.

One of the companies has indeed sold at 20 per cent, and another at 15 per cent. Even the least successful was able to pay 3 per cent. The market prices of the four companies have made advances, although the Economist attributes this to the fact that they have achieved that to gains which are expected in the coming year.

This statement is important, in view of the fact that the price of refined oil as fixed by the Standard Oil Company, in this country have been advanced in the past year. For instance, the price of refined cargo petroleum in barrels which last year at this time sold at 20 per cent, and another at 15 per cent. The average price in 1935 was \$7.48, and in 1936 \$7.34. It is on this advance in American petroleum that the Economist largely bases its prediction of better prices for the Scottish product.

The Economist also points out that the Scottish oil companies have been kept down by competition between Russian producers and Scotch contracts have been at the low figure of \$5 in the per gallon. These contracts run from August to August, and the change has been made in price.

But as American petroleum is scarce and dearer, and as Russians are expected to come to terms over burning, as they are, the price of Scotch oil is more than likely that Scotch contracts for lamp oil will be renewed at a considerable advance on last year.

Thus in every item of production they will benefit, and while the cost of production have been brought down to the lowest level on record, in fact, the long suffering mineral oil industry is once more booming.

Another purpose of the League is to educate public opinion to the free and universal use of the ballot, a hitherto neglected duty. It is freely stated that the League will be active tonight unanimously will. Gen. Diaz.

BLACKMAIL M. HINERY.

Efforts to Re-establish it in New York Police Department Are Making According to Gen. Greene.

(BY THE ASSOCIATED PRESS—A.M.)

NEW YORK, June 19.—In a speech before the Order of Acorns, Gen. Francis V. Greene, Commissioner of Police, has intimated broadly that attempts are being made in the police department to reestablish the machinery of blackmail, and that he has ordered the ward men to patrol duty last January. He added that he hoped to thwart the plan by preventing the formation of a new chain of connections.

"I want to say from my experience," he said, "that the average policeman is not crooked. He has more temptations thrown in his way than any man in another walk of life. He can make a month's salary in a minute by simply turning his head. The great majority of the force resist this temptation and do their duty."

"Organized blackmail has been broken in two and it has not been put together yet, and the police department is making in that direction. I think they can be defeated by preventing the reestablishment of the chain of connections."

BONES OF STORM VICTIMS.

They Came Near Being Converted Into Fertilizer Material, But Were Saved for Decent Burial.

(BY DIRECT WIRE TO THE TIMES)

LEXINGTON (Ky.) June 19.—(Exclusive Dispatch.) A boatman from the West Bay today brought in a boat load of bones, and sold them to a local junk dealer, part of whose business is to convert bones into fertilizer material.

The bones, which were human, were bleached bones. They were hauled to

CAUGHT LIKE RAT IN TRAP.

Pools of Human Blood Found in Elevator Shaft.

Electrician's Horrible Death in Laughlin Building.

No Blame Attached to Any of the Employees—Inquest This Morning.

Horrible was the death that came to Walter Hoehn, electrician of the Laughlin Block on South Broadway, yesterday afternoon. Just how it happened no one will ever know, but his lifeless body lies at the bottom of the elevator shaft, at the level of the second floor. The last time he was seen was when he was going to work. He was seen by the young widow, Mrs. Hoehn, who lives in the building. She saw him at the door of the elevator, and he was going to work. She saw him at the door of the elevator, and he was going to work. She saw him at the door of the elevator, and he was going to work.

THE OPTICIAN 301 S. SPRING STREET

TONS OF SWEETEST OF SWEET CHARITY.

LOS ANGELES CITIZEN WILL MAKE UNIQUE GIFT.

Will Send Ten Tons of California White-sage Honey to Fifty-five Florence Crittenton Homes, in Thirty-three States.

One of California's greatest bee-culturists, Joseph Moffatt, of this city, will do a unique thing when he gets his tons of honey moving all over the United States to supply, without the slightest remuneration, all the Florence Crittenton homes in the country with the delicious article gathered from our unequalled white sage.

Two years ago Mr. Moffatt and his wife visited all these homes with their founder, Charles N. Crittenton of New York, and became deeply interested in the women and children gathered under their roofs. They so enlisted the sympathy of Mr. and Mrs. Moffatt that they have determined to make the unusual gift mentioned.

There are fifty-five of these homes, and yesterday Mr. Moffatt began his distribution by supplying the local institution, and went outside by also supplying the Children's Home. The homes are located in thirty-three States, and Mr. Moffatt has estimated an average gift of about four hundred pounds to each home, making a total of over ten tons. He hopes to secure from the railroads free transportation for the honey, inasmuch as it is so free and liberal a gift.

There are perhaps very few men who, from their own product, either in California or in the world, could make such a gift. Mr. Moffatt has this year 650 stands of bees, and it is now the midst of the season. Enough honey has been gathered already to definitely estimate the crop at fifty tons for the season—which for that number of bees is about a half crop.

His bees are in the mountains of Los Angeles, San Bernardino and Ventura counties, ranging in distances of from five to thirty miles from the city. He is one of the greatest honey men ever known in California, which was in the year 1884, when he had a single apiary of 240 stands on the line between Los Angeles and Ventura counties. This single farm produced fifty tons of honey and increased to 475 stands during the season.

In October Mr. and Mrs. Moffatt will again go on a tour to the Crittenton homes with their founder.

Uncle Sam, Jr., Expresses His Sentiments Concerning The Times' Scholarship Contest—Testimonials From Last Year's Participants.

AN ACHING VOID.

Miss Ras Price of Santa Ana, "The Pride of the Peatlands," gave Miss Beckingsale a close run for first place last year, but she has not yet decided whether she will try for first place this year, or not. Should she make up her mind to come in, Miss Beckingsale will find that she will need the support of all the friends she has last year, and some additional encouragement, in order to maintain her prestige. Miss Price has been taking lessons in the gentle art of tooth-pulling in the Los Angeles Dental Col-

with Deputies Ward, Case, McNair and Constable Allen, all heavily armed. He left for Agua Mansa, a Mexican settlement three miles south of San Bernardino. They found Belarde standing in front of an adobe. He made no attempt at resistance. He stated that he was the man wanted, and that he had been in hiding in various places during the past six months.

Otto Thormer, an electrical expert from Germany, was mistakenly killed touching a live wire while inspecting a new switchboard for Germantown, Pa.

THE OIL INDUSTRY HOW STANDARD PIPE LINE IS HEATED.

LATEST METHOD TO MAKE HEAVY
CRUDE FLOW.

Important Suit Against Associated.
New Gusher for Santa Fe-Pipe and
Tank Men's Strike Reaches Oil Fields
of Kern—Stock Market.

With two men stationed every three miles along its pipe line between the Kern River field and Point Richmond to keep the oil moving, the Standard Oil Company hopes to force the heavy crude into its tanks by the bay.

So great have been the obstacles encountered in its attempt to transport heavy crude by pipe line that this new method has been adopted as almost a last resort. Besides being heated at the regular pumping stations, there will be the new heating stations every three miles. The latter are pits six by eight feet and about a half a foot deeper than the pipe. The large pipe is tamped and a small quarter-inch pipe put in. The small pipe runs along under the large pipe in the trench, and a stream of oil is allowed to pour into the pit, which is set on fire and kept burning night and day.

With a gauge to register the temperature, and a pressure gauge to tell how fast the oil is flowing, a man is kept on watch every minute night and day, and the heat kept to an exact temperature. The oil will be started from the main station at a temperature of 200 degrees, and it is estimated that with the heating stations that it will be possible to deliver the oil at the main station at a temperature of 120 degrees.

As the men are paid \$2.25 a day it can be readily seen that transportation by pipe line will be an expensive proposition if it will be necessary to maintain so large a force as is now proposed.

The Standard company's representatives still insist that the line is not a failure, but that it is now being flowing freely through the entire system.

UNION COMPANY'S PIPE LINE.

Another pipe-line project is the construction of a line between the Union Oil Company of this city between its Los Angeles oil lands and the water. The company now has surveys in the field to select the best possible route that will give a gravity flow. It is the intention to construct the line along the entire length of the Los Angeles anticline if possible, just as soon as the production of the territory will warrant.

The Union is laying plans for extensive operations in this territory, and is an inducement to other operators it is understood that the company has agreed to purchase all oil produced.

NEW SANTA FE CRUISER.
The Santa Fe has added another gem to its string of wonderful performers in the Pullerton field. Word was received yesterday that a new well brought in on its lease is good for at least 400 barrels a day, and that the oil is flowing over the casing. The oil is of light gravity.

WANTS MCKITTRICK PROPERTY.
Reports are circulated in the oil industry that the Southern Pacific has been making bids on all lands in the McKittrick field. It is understood that the property of the McKittrick Oil Company is the prize desired.

AGAINST ASSOCIATED.

SHAMROCK BRINGS SUIT.
(BY THE ASSOCIATED PRESS—P.M.)

BAKERFIELD, June 1.—A suit that may be fraught with the greatest importance to the great combine that now virtually controls the oil output of Kern county and to oil men generally was filed in the Superior Court this afternoon by Attorney C. C. Boynton of San Francisco in behalf of the Shamrock Oil Company against the Associated Oil Company. Damages to the amount of \$500,000 and the restoration of the Shamrock property to McKittrick, which was transferred to the Associated by a former board of directors, is asked.

According to the allegations of the plaintiff, there was a late board of directors of the Shamrock, Messrs. Porter, Green and Whittier, were also interested in the Associated. They constituted a majority of the board and transferred the property of the Shamrock to the combine. This action, it is claimed, was taken to the detriment of the stockholders, and the latter have now elected a new board.

The property in dispute is the land at McKittrick on which is located the famous gusher of the Shamrock, which is producing some 1500 barrels a day. The result of the suit is of the greatest interest, not only on account of the property interests immediately involved, but on account of the effect that an adverse decision, it is said, might have upon other holdings of the Associated.

Dean's
Invites the trade of people who appreciate and demand pure drugs, quick service and polite attention together with lowest possible prices and large assortments of new goods—Dean's trade is evidence of the existence of these conditions at the Busy Drug Store—people are fast learning that Dean's is headquarters for drug store goods. Come and see for yourself.

GOING AWAY. The day of car-pet bags is past and suitcases have a place to the suit case. We would like to interest you in our new suitcases which include some of the best suitcases and steamer hand trunks ever manufactured. If you want to be strictly up-to-date you will be interested in this display. Prices range up to \$40.

UNBREAKABLE. We are showing the largest assortment of good hair combs ever brought to this coast and the prices at which we are selling them admits of every woman having an indestructible comb. You will find here every size, every color, and every price from 10c to \$1.50.

Assortment of face preparations, creams and lotion: exceeds any sold in L. A. Angeles. The Poppy Cream and Dean's Freckle Salve, the former at 50c and the latter at 25c and 50c are the best on the market.

Important Notice You are notified that on Tuesday morning next will begin at Dean's the greatest special sale of Toilet Soaps ever held at any store in Los Angeles, not excepting Dean's. Over 3000 boxes of odds and ends in broken lines of good toilet soaps will be sold at about one-half the usual prices. The wise ones know what a Dean soap sale means. Do not forget it.

No. 2. Flexo The steadily increasing popularity of this instrument is conclusive evidence of its worth. It is simple in its construction and it stands the supreme test—it takes good pictures. Without exception it is the most reliable \$5.00 kodak ever offered.

Stop Squinting It may be a little bothersome to wear glasses but when you're in the sun a pair of good smoked glasses are very useful to the eyes. We carry all kinds of spectacles and eye glasses for this use, ranging in price from 50c to \$5.00.

Wire A hair brush that is used a great deal by the children wears better and keeps cleaner if it is made of wire. Just as comfortable as the bristle brush. 25c to \$1.50.

Dean's Violet Ammonia is a delightful perfumer of the bath. Softens the water and makes the bath a pleasure. Large bottle 25c.

See the A person cannot have too much Display writing paper if it's good. Most 25c box paper is of unsatisfactory quality but we have now on sale a large stock of new papers at 25c that are generally sold at 40c. New shades and shapes. All beautiful boxes and of superior weave. Lined and unlined.

The overcrowded condition at Dean's soda fountain is conclusive evidence of the popularity of Dean's drink. Per-piring humanity refreshes itself with the newest drinks served by expert mixers.

Candy Special Today We are selling today delicious Coconut Chocolate made in our own factory fresh every hour. Regular price 40c, today at 20c a pound.

DEAN'S DRUG STORE
Second and Spring Sts. Phone Main 509.

Don't Bite Your Nails. In order to cure yourself of the ridiculous habit of biting your nails get a nail clipper. You will find it convenient to use and efficient in its work. 50c to \$1.50.

Hot Weather like this like to know the temperature. They know it's warm but they don't know how warm it is. They have a reliable thermometer. The one shown in this ad is a new one having the correct scale on the dial with six wings as indicators. Can be seen from all sides. Prices range from 50c to \$2.00.

Worse Every Day
That's the trouble—you think it is only a little backache—but it gets worse every day.

It doesn't do to neglect it; it isn't safe. Backache is really kidney ache—To cure it you must cure the kidneys—Help them to do the work nature intended them to do. If you don't, other kidney ills will follow—Urinary troubles, Diabetes, Bright's Disease.

Doan's Kidney Pills
Help the kidneys to do their work—Make them strong and active—The backache is cured because the cause is removed.

Hundreds of Los Angeles people will tell you so—They have used Doan's Kidney Pills—and they know. Here is one instance:

Mrs. S. F. Halsey, of 114 Utah street, says: "For at least six years I had backache sometimes so acute that I was unable to perform ordinary household work. When the attacks were at their height indications of gravel existed and only those who have suffered from a complication of these troubles knew exactly what a victim endured. During the last attack I went to Dean's drug store, corner of Second and Spring streets, for Doan's Kidney Pills and took a course of the treatment. I never before used any medicine which brought such positive results. I sincerely hope the effects may be lasting."

Doan's Kidney Pills are for sale at all drug stores—50c a box.

THE KING OF ALL BRIDGES.

Largest Concrete Viaduct in the Whole World.

Being Completed by Salt Lake Railroad Company.

Colossus Spans Santa Ana River Near New Station of "Pedley."

Imagine a viaduct a fifth of a mile long, with a maximum height of 70 feet, supported by ten huge arches, eight of which have each a clear span of 80 feet, resting on bases 142 1/2 feet, the whole structure built of solid concrete capable of supporting thousands of tons—this is the form of the viaduct of the wonderful bridge by means of which the trains of the Salt Lake Railroad from Los Angeles will soon cross the Santa Ana River en route to Riverside by way of Pachapa Hill.

The reading of the foregoing facts, however, affords but an inkling of this stupendous concrete accomplishment.

Only when standing on the low banks of the Santa Ana and looking up at the heights of the abutments of masonry can one adequately sense the gigantic proportions. For this bridge is the largest of its particular kind in the world—although a smaller one of concrete has now been completed in Switzerland—and it will be ranked as one of the wonders of Southern California.

A single man, Henry Hawgood of this city, chief engineer of the Salt Lake, is responsible for the success of this new departure in the engineering life.

When it became evident that the huge bridge must be constructed, and this at a time when structural steel could not be obtained in large quantities, the steel companies being money behind with their orders, Mr. Hawgood had recourse to some constructive ideas of his own, that would not require the use of Mr. Schwab's commodity for fulfillment. The result was the plan for this viaduct of concrete, which material is coming into usage now for constructive purposes on account of its extreme hardness. Constantly solidifying with age, its durability is practically limitless, and the cost of maintenance infinitesimally small.

Mr. Hawgood has directed the method of construction, his plan being followed to the minutest detail, and to him is due all the credit which is certain to accrue, when the bridge is completed.

Yesterday a Times representative went over the road southeast from Ontario to the bridge in company with Assistant Engineer Olmstead. Leaving Ontario on the engine used for hauling supplies, material and workmen, the trip of fourteen miles "to the front" was made over as fine a stretch of level, well-ballasted track as one would care to see. Passing through the 2200-acre vineyard of Charles Stern & Co. of Los Angeles, which concern is now building a winery on their land—hence further on to the new station of "Pedley," named for the president of the San Jacinto Ranch Company, owning 3000 acres in that locality, the road continues directly through this land. Twelve miles of the track is ballasted with an excellent decomposed granite, and is so smoothly surfaced that no railroad ties are in sight. The tops of several concrete abutments, finely constructed, along the route are also entirely finished and surfaced with granite, like the main roadbed. The notes attendant upon the passage over a skeleton bridge is therefore absent.

ARMY AT WORK. Arriving at the big viaduct opportunity was given for inspecting the magnitude of the building operations which have been carried on by a force of 500 men since the first of the year. At each end of the bridge is a massive concrete abutment and an arch spanning 38 1/2 feet, which would in themselves seem large were it not for the fact of their proximity to the right more than twice larger ones. All of the arches are being built in seven

large segments, including the center key. Temporary skeleton frameworks and piers shown in the accompanying pictures have been constructed of lumber and the tamped concrete is made to conform to the outlines defined thereby. The weight of the arches rests upon concrete piers, these in turn upon the solid concrete bases, 142 1/2 feet, the footings of which are the solid rocks of the river bed itself, varying in depth from 12 to 30 feet. Pier No. 7 of the bridge reaches to the latter depth. It was necessary to keep steam pumps working to force out the water while the foundations were being constructed.

Each footing supports a weight of 500 tons irrespective of its arch, and each arch contains 265 cubic yards of concrete, every cubic yard of which is computed to weigh a ton and a half. All of the arches contain 2220 cubic yards of concrete, while there are 14,000 cubic yards in the whole bridge structure. Therefore it can be readily understood that the weight of a common fifteen-

commissary department, which for the past six months has provided for the feeding of the 200 hungry bridge builders, who have been laboring so assiduously upon the construction of this largest concrete viaduct in the world, which will cost, when completed, between a quarter and a half million of dollars.

SAN DIEGO COUNTY. GRANT AND VICE-PRESIDENCY. (BY DIRECT WIRE TO THE TIMES.) SAN DIEGO, June 19.—[Exclusive Dispatch.] U. S. Grant, Jr., whose candidacy for Vice-President on the Republican ticket in 1904 with Roosevelt was announced this morning, has received many congratulations and assurances of support. Asked this afternoon for an expression regarding his candidacy, Mr. Grant said: "I have not announced myself as a candidate for the Vice-Presidential nomination, but I have known that

some of my friends have entertained the feeling that the position ought to come to this Coast, and that I was probably as available a candidate for it as any other citizen of the section. Mr. Roosevelt can carry the great West without the assistance of a western man, and I think he will favor some eastern man."

An Ohio Lawyer's Bill. Here is the story of an Ohio lawyer who did not become a politician, as was not built on political lines. It is told by a Washington man, who was his clerk at one time. Lawyer B. was a clerk sort of personage and believed in making everyone pay for every service. One of his clients was the president of a bank, who during the presidency of his case, dropped into the lawyer's office very frequently and told stories. The lawyer was a good listener, and seemed to enjoy the stories very much, but after the banker went out Lawyer B. would say: "Here, charge Mr. — \$10 for an hour of my time. If I have got to listen to his stories he has got to pay me for it."

Finally the bill was made out and carried to the banker. It was an itemized account, stating the date of each call. He scanned it closely and remarked: "He has made me pay for it pretty well, hasn't he?" asked the clerk. "For listening to my stories." "And then he paid the bill." [Washington Post.]

LIKE ARMY BARRACKS. The camp established by Stone Bros., the bridge contractors, located on a knoll across the river from the mixing plant, is an interesting sight. Here the rows of neat, tarred-paper houses and tents the quarters for the officers, the general office the mess-room and kitchen are strongly suggestive of army barracks, the more so because some of the tents used bear Uncle Sam's indelible government imprint upon their fronts. The laborers and teamsters have their banks in the little houses and tents, the superintendents, foremen and engineers, their quarters. A row of stables shelter the horses, while a small retinue of cooks, dishwashers and waiters preside in the

camp. The bridge builders laboring in day and night shifts, temporary are lamps run by an electric dynamo furnishing light at night, the time for the completion of the bridge is a matter of conjecture, some say six weeks or less. When finished, it should be allowed to harden for thirty days before being put to general use. By that time it will have attained solidly sufficient to support any weight that will ever be placed upon it, although the hardening process will continue for two or three years.

CANNOT SHIP THE CORPSE.

Telegram States Swensen is In Sonora Grave.

Crowell Brings Report Chums Met in Santa Ana.

If That is Correct, Brown Probably is Still Alive—Dim Light.

On the part of the friends of Anton Swensen and Newton Brown, the conviction is deepening that both men have been murdered. Yesterday's developments only add to the strength of their suspicion—that Brown was killed some weeks ago in the Attila (Sonora) district of Mexico, and that Swensen the whereabouts of his partner, he, too, fell by the hand of assassins.

The relatives and friends, as well as Swensen's attorney, John H. Foley, suspect that the signature "Newton Brown," attached to the telegram received Thursday night by Byron Waters at San Bernardino, is the bogus production of a man who is masquerading as the real Brown, and who probably was concerned in the murder of Brown and of Swensen.

But these dark surmises are not facts. Actual information is the one thing that will establish the correctness of the assumption, that both men have been murdered, or destroy that theory; and definite information is the one thing that thus far it has been impossible to secure.

Mrs. Swensen wishes that some one would be sent from Los Angeles to Sonora, to learn the truth, whether Swensen really is dead, whether Brown really is living, and everything.

Mrs. Brown says: "If I had the money I would go myself." It is not hard to imagine the distress of the two wives.

LETTER FROM VASQUEZ. The expected letter from Ramon Vasquez to Attorney Foley, mentioned in the former's meager telegrams to the latter, reached Mr. Foley yesterday afternoon. That Vasquez is a responsible citizen of Nogales is indicated by the following letter-head on the stationery: "The Red House, Ramon Vasquez, Wholesale and Retail Dealer in Dry Goods, Hats, Boots and Shoes; Notions, etc. Nogales, Ariz." The letter is as follows:

NOGALES (Ariz.) June 17, 1903.—John H. Foley, Esq., attorney at law, Los Angeles, Cal.—Dear Sir:—Your telegram just reached me a few moments ago. As per my answer to you by wire this evening, I am writing to inform you as fully as I can regarding the death of Anton Swensen. I met Mr. Swensen here a few days ago, and he informed me that he was going into the Republic of Mexico on mining business. He was very anxious that my book-keeper should accompany him on the trip, but at that time I could not spare him. I found another young man, however, who went with him, but he was compelled to return in a few days on account of sickness. Mr. Swensen returned with him. He again persuaded me to allow my book-keeper to go, and I consented. They left here Monday last, and this morning I received the following telegram from my book-keeper:

"TABUTAMA (Mex.) June 17, 1903.—Ramon Vasquez, Nogales: We arrived at Attila today. Swensen met me and told me that he was in a bad way. You can arrange for the bringing of the corpse. Brown and I are detained by the authorities at Attila as witnesses. Tomorrow they will take us to Altair. Do me the favor not to tell my family."

(Signed) "ALEJANDRO." Thus, you see, not having heard any further today, I am unable to give you any particulars at present.

Attila is more than fifty miles from the railroad, and there being no doctors, ice, nor any methods by which a body could be preserved, it is almost certain that burial has already taken place. The heat there is intense at this season of the year, being in the neighborhood of 110 deg., so you can see that decomposition would set in almost immediately, and after a few hours it would be impossible to transport the body.

I will probably hear from my book-keeper tomorrow, and as soon as I do will give you full particulars.

If you desire to have the matter investigated, I take pleasure in recommending William F. Cooper, an attorney of this place, who will take charge of the matter, and ascertain full particulars.

Very truly yours, (Signed) RAMON VASQUEZ. Mr. Foley hopes for a further letter, giving fuller information, from Vasquez today or tomorrow.

The point that stands out most prominently to discredit the bare statement that "Swensen was shot and killed at Attila by Brown" is as pointed out in yesterday's Times, the insufficient time for the happening of this tragedy in a place so remote as Attila. That is to say: June 14 Swensen was at Nogales, having temporarily turned back from his Attila trip to bring home his interpreter, who had been taken ill. In this letter he says he is about to leave Nogales for Santa Ana, fifty-odd miles southeast, to inspect some mines there; and that then he will go on to Attila, northwest from Santa Ana. Such

an itinerary would certainly require that Swensen travel at least four or five days before reaching Attila, and that calculation would not allow him more than one-half day for his Santa Ana inspection.

Yet on June 17, three days after Swensen posted his letter to Nogales, Vasquez writes to Foley telling of Swensen having been shot at Attila by Brown, and stating that Swensen was killed at Nogales from Swensen's interpreter, dated Tabutama, June 17. Tabutama is eight or ten miles north of Attila, by trail. So, in less than three days, Swensen must have journeyed, over wretched roads made hardly passable by the rains, from Nogales to Santa Ana, and thence back to Attila, in order to have been murdered at Attila June 17; and within the same time a courier must have ridden from Attila to Tabutama in order to have sent the telegram quoted in Vasquez's letter to Foley.

It is true that Swensen may have abandoned the Santa Ana trip and gone directly south on the Mexican Central to Magdalena; but even so, he would have had to take horse from the latter point to Attila, a distance of fifty or sixty miles.

To sum up, the only apparent deduction is, in the minds of Swensen's and Brown's friends, that both men have been murdered—Brown before the departure of Swensen for Mexico—and that all these telegrams are part of a desperate plan to cover up the guile facts.

Yesterday Mr. Foley, acting as has— (CONTINUED ON THIRD PAGE.)

Brown and I are detained by the authorities at Attila as witnesses. Tomorrow they will take us to Altair. Do me the favor not to tell my family."

(Signed) "ALEJANDRO." Thus, you see, not having heard any further today, I am unable to give you any particulars at present.

Attila is more than fifty miles from the railroad, and there being no doctors, ice, nor any methods by which a body could be preserved, it is almost certain that burial has already taken place. The heat there is intense at this season of the year, being in the neighborhood of 110 deg., so you can see that decomposition would set in almost immediately, and after a few hours it would be impossible to transport the body.

I will probably hear from my book-keeper tomorrow, and as soon as I do will give you full particulars.

If you desire to have the matter investigated, I take pleasure in recommending William F. Cooper, an attorney of this place, who will take charge of the matter, and ascertain full particulars.

Very truly yours, (Signed) RAMON VASQUEZ. Mr. Foley hopes for a further letter, giving fuller information, from Vasquez today or tomorrow.

The point that stands out most prominently to discredit the bare statement that "Swensen was shot and killed at Attila by Brown" is as pointed out in yesterday's Times, the insufficient time for the happening of this tragedy in a place so remote as Attila. That is to say: June 14 Swensen was at Nogales, having temporarily turned back from his Attila trip to bring home his interpreter, who had been taken ill. In this letter he says he is about to leave Nogales for Santa Ana, fifty-odd miles southeast, to inspect some mines there; and that then he will go on to Attila, northwest from Santa Ana. Such

an itinerary would certainly require that Swensen travel at least four or five days before reaching Attila, and that calculation would not allow him more than one-half day for his Santa Ana inspection.

Yet on June 17, three days after Swensen posted his letter to Nogales, Vasquez writes to Foley telling of Swensen having been shot at Attila by Brown, and stating that Swensen was killed at Nogales from Swensen's interpreter, dated Tabutama, June 17. Tabutama is eight or ten miles north of Attila, by trail. So, in less than three days, Swensen must have journeyed, over wretched roads made hardly passable by the rains, from Nogales to Santa Ana, and thence back to Attila, in order to have been murdered at Attila June 17; and within the same time a courier must have ridden from Attila to Tabutama in order to have sent the telegram quoted in Vas

THE PUBLIC SERVICE IN THE COURTS AND OFFICES.

SUMMARY OF THE DAY.

A conference between members of the Council and representative bankers took place yesterday, and it is now believed that the banks will take the \$400,000 school bonds at par, as the number of franchise questions were discussed before the Board of Public Works yesterday.

Christie and Taylor, who are alleged to have cheated the Continental Building and Loan Company of San Francisco, were brought before Justice Pierce for preliminary examination.

Thomas Fanlon, formerly a great Yale carman, was sent to the insane asylum yesterday.

Mrs. Lee Barr swooned in court yesterday while waiting for her divorce case to come up.

In the Police Court, S. P. Voorhees, a striking union lineman, was arraigned for committing an assault upon an independent workman for the Sunset company.

AT THE CITY HALL.

CITY FATHERS HOPE TO MARKET SCHOOL BONDS.

CONFERENCE WITH BANKERS WAS HELD YESTERDAY.

Encouraging Assurances Received and the Prospect Now is that the Bonds Will be Spoken for Within a Few Days—Board of Public Works.

There is now a good prospect that the \$400,000 school bonds will be absorbed by the local banks. Civic pride is a compelling factor in the situation. The schools are needed. Citizens are impatient at the delay in marketing the issue. The banks that come forward now and take the issue will receive the approval of the public.

Although the rate of interest is only 3 1/2 per cent, the money paid for the bonds will be less than the interest withdrawn pro rata so that the banks will benefit during the period that the sites are being secured and the buildings erected. An opportunity will be given the banks to dispose of the bonds for private investors or to transfer them to the eastern market during this time.

Bankers say they can get 6 per cent interest for all the money they handle, and that they do not believe it good policy to tie their funds up in 3 1/2 per cent bonds. Therefore the city authorities are trying to make such arrangements as will meet the objections of the banks on this score.

The conference between the bankers and the Councilmen which was held yesterday morning at the First National Bank. The bond situation was thoroughly discussed. While no definite agreement was reached, the city fathers were much encouraged by their talk with the bankers. The financiers who attended the conference seemed desirous of doing all in their power to aid in the sale of the securities. As far as the proper exercise of business judgment will permit they will help in marketing the bonds, and raising the money for the construction of the schoolhouses.

It is expected that between now and the Monday session of the Council the school-bond issue will be fully subscribed, although circumstances may arise which will require a longer time for adjustment.

City Attorney Mathews feels very hopeful of the outcome, not only as far as the school bonds are concerned, but as regards the entire issue of \$2,100,000. While all money is cheap on the New York market the rate of interest is not so favorable to the sale of the bonds.

That the situation may clear up in a short time.

FOR FRANCHISES.

BOARD OF PUBLIC WORKS.

Many questions were argued before the Board of Public Works yesterday, but, as usual, franchise problems held the center of the stage.

Property owners on East Sixth street, headed by the New Method Laundry Company and the Church of the Nazarene, protested strongly against the sale of the L. C. Brand franchise on that street. This franchise is now being advertised and will be sold by the Council next Monday, providing the proper bid is presented. The board listened patiently to the arguments of the protesters and later decided to await the outcome of the bidding on Monday morning. If a large bid is received for the Brand franchise it will be rejected and the franchise re-advertised.

Members of the board do not state, however, just what will be considered a sufficient bid. Chairman Nofziger estimated yesterday that the franchise should bring \$30,000 or \$50,000; the city could not afford to reject it.

Attorney Mathews declared that the construction of a railway on Sixth street would cause a loss of business to the laundry company. He said all the machinery would have to be changed about in order to allow delivery of goods to reach the plant on another street.

Dr. Phineas Breece, pastor of the Church of the Nazarene, said they had invested \$40,000 at the corner of Sixth and Wall street in the church property mainly because they thought no street-railway line would ever be built there.

With a railway line on Fifth street to the north and on the streets both east and west of the church, he thought it safe to invest on Sixth street. The street is but forty feet wide between the curb and the double track standard gauge line is built in the center of the street.

It is alleged that great damage would be done to the church by the street through the interruption of the service, but because those who drive would have no opportunity to hitch teams.

MAIN-STREET LINE.

Property owners on South Main street appeared before the board, came to petition for and some to protest against the sale of a franchise on the street. N. E. Dewald was the speaker for the petitioners and his speech summarized the arguments for the franchise. He said the property owners had spent \$25,000 in improving Main street and that in the last six years only one building had been erected.

"Some seem to want a boulevard," he continued. "Well, we built a boulevard. We've had it for years and now we want the railway. We'll take the railway, and let the other fellows have the boulevard."

M. E. Walker wanted the franchise sold. He said a car line on Main street would be a good thing, but he

had no faith that the railway company would build it.

In the delegation were many men who have lived on the street for eight and twenty years.

Dan F. Reynolds, Esq., presented the objections of the property owners who believe that car lines should be built on South Main street which is now about the only well-graded street in the southern section of the city not covered by the street railway.

He argued that the car line should be built on Main street, which is one-fourth of a mile west of Main street, as originally planned by the Los Angeles Railway Company.

The property owners stand ready to deed to the city an eighty-foot street, with almost the entire length of Main street, as originally planned by the Los Angeles Railway Company.

He argued that the car line should be built on Main street, which is one-fourth of a mile west of Main street, as originally planned by the Los Angeles Railway Company.

The people of the section would have both a car and a boulevard, he said, if the franchise was granted over Main street. He thought that the Council should not allow South Main street to be destroyed by a street railway line, but should provide an entrance from it to South Park street and turn it over to the Park Commission as a boulevard.

The board took the franchise question under advisement. A meeting of the board will be held next week to organize, and make a united effort to get the street railway on their street. It is said that if the avenue owned by Silasus Avenue that it will be continued through the county to an outlet at the ocean, thus making a through street.

THERE ARE OTHERS.

The application for a franchise on Tenth street, from Vermont avenue to Western avenue, was considered by the board. It was decided to hold the petition pending the opening of Tenth street.

Oscar Lawler appeared before the board in behalf of Bruce Cronwell, who is the applicant for a gas franchise. Lawler maintained that under the decisions of the Supreme Court, no gas franchise could be granted without the approval of the Council in order to secure the coveted franchise.

Not a word was said about the street-sprinkling bids, and they will be held over for another week at least. It is asserted that the bid of Charles Stansbury is irregular, and that the several propositions advanced by A. P. Cross, the present contractor, are the only ones that should be considered.

Petitions to open and widen San Pedro street to a uniform width of eighty feet, from First to Fifth street, were granted by the board. An improvement association is now being formed to secure the opening of the street through the city.

A petition for the opening of Thirtieth street, from Kansas street to Building avenue, was granted.

AT THE COURT HOUSE.

BRAZEN EXHIBITION BY TAYLOR AND CHRISTIE.

ACCUSATIONS DO NOT APPEAR TO WORRY THEM.

Their Preliminary Examination on Serious Charge of Defrauding the Continental Building and Loan Company Began Yesterday Before Justice Pierce.

Serious criminal charges have seldom been faced with such unmitigated "brass" as was shown by Henry Christie and A. J. Taylor when they came before Justice Pierce yesterday for a preliminary examination on a charge of defrauding the Continental Building and Loan Association.

It is not even known yet what is the extent of their alleged stealings from the company; certainly not into large sums of money. To watch the two in court one would hardly think their offense could be of a worse nature than riding a bicycle on the sidewalk.

Both assistants chattered and Taylor, who came up in a jaunty Panama hat made into a sombrero shape, seemed to think it all quite a joke. He grinned and winked at the jury, and the judge, and the spectators.

The complaint charged that Taylor and Christie and the E. F. Master, who has fled, conspired to defraud the company in the sale of one of the parcels of property on New England avenue and giving its value at a sum to justify the loan—\$4000. As Taylor and Christie were not present, the case was postponed to June 28.

The complaint alleges that every one of their representations made to the company were false.

William Corbin, the president of the company, who came down here for this case from San Francisco, was the first witness called yesterday. He testified to the sending of the money and the receipt of the same from Christie and Taylor and also to the making of the application for the loan which appeared to be signed by Coons.

Every trick of law was invoked to shut out damaging points. Coons went on the witness stand later with damaging evidence against the pair.

He said that he went to Christie's office and entered into negotiations to get a house for himself. He should buy a lot on New England avenue on the installment plan and that he should get money from Taylor and Christie to be built. It was arranged that they should put up a house with five rooms and bath.

He said that he paid \$10 a week until \$200 had been paid and then the installment was to be cut down.

It was arranged that Coons, apparently, for he saw his house go up, yesterday, when he was shown the application for a loan which he is reported as asking for a loan of \$2400. He denied ever having signed it; said the signature thereon was a forgery. He was also shown the draft for

\$2250.20, which was indorsed on the back with his signature as token of receipt. He denied that he had ever received the draft or that he had indorsed it. He claimed that signature, too, is a forgery.

This is the dodge that the smooth young lawyer is using to get money with which to build houses and then substituting to the company faked applications for larger sums. By reason of their positions as the company's appraisers, they were enabled to get the loans made. The difference in the amount of the real application and the fake application, it is alleged, they pocketed.

At the time when they represented to the Continental Building and Loan Company that the Coons property was improved to the extent of being worth \$4000, Coons testified yesterday that the lot was perfectly bare, and that the house had never been started.

The examination will go on at 9:20 o'clock this morning.

POOR FANLON.

MANIC LAWYER.

Muttering a crazy little tune to himself, dirty and unkempt, Yale's great stroke art, Fanlon, was carried out of Justice Wilbur's court yesterday, a merrily droll man.

His is one of the saddest cases that has ever come before the insane commissioners. Part of his story was told in the Times Wednesday. He was found wandering around in the mountains and was finally caught only because it impressed him as an amusing thing to do.

He has been staying with his wife, a water hydrant and let the water run over him.

After leaving Yale and taking a post-graduate course at Columbia, Fanlon became one of the attorneys of the traction railway system of New York City.

While riding home one night he fell

asleep and was suddenly awakened as he was passing his destination. He ran out and jumped, fell, and struck his head. He has never fully recovered from the injuries sustained. A piece of his skull was taken out, and after that operation he was able to go into business again, but he has been staying with his wife.

He was able to do a little work here and there, but he has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

He has been staying with his wife. He has been staying with his wife.

she made out of the Jersey cow's milk—that is what she says.

She claims, however, that recently they came swooping down upon her with a man named George Gray, who furnished a constable's star and claimed to be an officer. By threats and cuffs words, they scared her into giving them \$20.

If her story is true the man Gray is liable to get into serious trouble. She claims that he is an insane officer. She asks for \$200 damages.

ANOTHER YAWP.

FROM LOWE GAS.

In spite of the fact that the Supreme Court has kicked out the last law from under them, the Lowe gas people have set up another squeal-at-law.

A telegram came to the District Attorney yesterday stating that the Lowe gas case will come up again in the Supreme Court next Monday morning. This time it will be on a writ of habeas corpus.

The Lowe gas people will take advantage of the fact that the members of the factory in the Arroyo Seco is under arrest on a charge of manufacturing gas in the district forbidden by law.

His case will be taken to the Supreme Court on habeas corpus and the whole question of the alleged unconstitutional of the law forbidding the establishment of gas companies in certain districts will be opened up again.

The trial of Anthony Mags for permitting persons to enter his saloon at Third street and Central avenue, on Sunday, occupied the day in Justice Chamber's court. The jury acquitted.

Mags in spite of the positive evidence that he had violated the law. Three policemen and three citizens swore they had been in the place.

COMMISSION TRYING VOTING MACHINES.

THE STATE BOARD CONSIDERING PASADENA DEVICE.

Management of the Invention Hopeful of Great Success—Modus Operandi of the California Company's Ingenious Ballot Recorder.

Few people have ever seen a voting machine, but every elector in America is interested in mechanical balloting, while all authorities agree that the time has come when States, counties and municipalities must investigate the subject thoroughly with a view to purchasing for general use the most meritorious machine. At the present time the California Voting Machine Commission has the matter under careful consideration, and a report is promised to be forthcoming on or soon after July 1.

It is of genuine local interest to know that the National Voting Machine Company of California, with headquarters and manufacturing in Pasadena, hopes to win the recommendation of the commission.

The National Voting Machine Company is exploiting the very simple patent of H. B. Carey, an old man of very large experience with his own inventions, and has been in Pasadena since the Carey machine was introduced in 1894, for use during the next Presidential election.

The cost of production is such that the selling price, it is said, will not exceed \$40, depending upon the size of the machine.

To be appreciated, the wonderful little Carey machine has but to be seen. Through the courtesy of Louis Blankenhorn, investment broker, yesterday, that a Times reporter was shown the construction and modus operandi of the simplest voting machine on the market.

To preserve absolute secrecy of the ballot, to get unfailing accuracy in the count, and to secure simplicity in voting that anybody and everybody may vote quickly and as he pleases, has been the aim and reward of the inventor, said Mr. Blankenhorn, as he discouraged earnestly upon the merits of a bit of mechanism that the product of a lifetime of brain and years of patient toil.

"In voting," continued the speaker emphatically, "the voter is not dependent upon any spring or on gravity for action. Every motion is positive, firm, forward and backward. Pressing it key upon the keyboard conveys a forward motion upon the levers underneath and pulls the tape so that the number of the secure such simplicity in voting that anybody and everybody may vote quickly and as he pleases, has been the aim and reward of the inventor, said Mr. Blankenhorn, as he discouraged earnestly upon the merits of a bit of mechanism that the product of a lifetime of brain and years of patient toil.

"In voting," continued the speaker emphatically, "the voter is not dependent upon any spring or on gravity for action. Every motion is positive, firm, forward and backward. Pressing it key upon the keyboard conveys a forward motion upon the levers underneath and pulls the tape so that the number of the secure such simplicity in voting that anybody and everybody may vote quickly and as he pleases, has been the aim and reward of the inventor, said Mr. Blankenhorn, as he discouraged earnestly upon the merits of a bit of mechanism that the product of a lifetime of brain and years of patient toil.

[NEWS REPORTS FROM TIMES CORRESPONDENTS.]

50c Sheet Music at Per Copy 19c

The following choice new music specially priced for Saturday

Stylishly Trimmed Millie

If, by granting this half holiday, we can reverse the order of things complained of by Mrs. Russell Sage, we will feel amply repaid for our concession and pecuniary loss.

While we are satisfied that we have the largest and best assortment of men's clothing to be found at any department store on the Pacific Coast, should we take a dozen of the most popular lines and specialize them, we cannot impress you more firmly with the values which can be obtained here than by repeating our offer of this week of an exceptionally large assortment of all wool Worsted, Fancy Cheviot, nub Cassimere, Thibet and unfinished Worsted suits—every one lined with best quality Serge; are in broad shoulder effect; have new long narrow lapels and unbreakable fronts; coats in sack style, single or double breasted; sizes 34 to 44. They are the same as those displayed in our large show window and are absolutely matchless anywhere under \$12.50 to \$15.00. While they last, priced at choice per suit

CHILDREN'S \$1.00 SAILORS—plain or fancy colors; smooth or rough ribbons; prettily trimmed with silk ribbons and streamers; absolutely matchless in the city under \$1.00. Priced as a Saturday leader at **75¢**

SECOND FLOOR

\$15.00 DRESS HATS—Lace roll brim and high crown of allover lace and satin bows have folds of chiffon or tulle underfacings and trimmed with bows, dots, daisies, ribbons, etc.; also satin braided hats in styling shapes. Choice of the lot, Saturday **\$8**

LIBERLY SATIN RIBBONS—soft finish; nice quality; coloring blue, pink, maize, Nile cardinal; also black, white and cream; 4 inches wide; 80 values. **19^c** Saturday per yard.

FANCY STRIPED AND FIGURED RIBBONS—all silk; also satin Taffeta and Liberty satin ribbons, popular colorings also black, white and cream; widths 4 inches and values up to 50¢.

23^c

WOMEN'S WASH—better patterns; new and solid white, white and black, white and color combinations; va uses up to 75¢.
